INTEGRATED HEALTH CARE

ETHEL AND JAMES FLINN FOUNDATION
WHO WE ARE AND WHAT WE DO

- **Mission:** To improve the quality, scope and delivery of mental health services in Michigan
- **Geographic focus:** Wayne, Oakland, Macomb, Washtenaw counties and state-wide initiatives
- **$65 million in assets, $3 million annual grantmaking budget**
- **RFP process:** Use applied research to advance evidence-based practices
- **Implementation grants, operating support, capacity building, policy and advocacy support**
- **$25,000 to $150,000 - one year and multi-year range**
WHY WE SUPPORT INTEGRATED HEALTH CARE

- On average people with mental illness die earlier than the general population because of co-occurring health conditions
- Improves access to behavioral health care (70% of people with mental health symptoms go to primary care, less than 50% able to get care)
- Provides early intervention and treatment for mild and moderate mental disorders when they are more treatable/manageable
- Improves health outcomes (treats the whole body more effectively)
- Cost effective (reduces emergency department use, hospitalizations)
- Sustainable/Scalable (reimbursable, knowledge base, learning community)
WHAT MODELS WE SUPPORT

- The Foundation supports models that integrate/coordinate physical health care, mental health and substance abuse treatment in primary care settings.

- Grant awards support implementation models that incorporate standardized mental/substance use screening process (PHQ-9, SBIRT, etc.), routine assessments (MSW behavioral health specialist), treatment (MSW, Primary Care Doctor, Psychiatric Consultation), and follow-up care within primary care service delivery model (clinical staff, training, capacity building).

- Evidence-based models include collaborative care, IMPACT, four-quadrant, patient-centered care, health homes, etc.
WHO WE’VE SUPPORTED 2009 - 2011

$100,000 TO $150,000 ANNUALLY - UP TO 3 YEARS

- Children’s Hospital of Michigan (Hospital Outpatient Clinics)
- Henry Ford Health System (School-based Clinic)
- Oakland Primary Health Care (FQHC)
- Sinai-Grace Hospital of Greater Detroit (Hospital Emergency Department)
- St. Joseph’s Mercy Oakland (Hospital Outpatient Clinics)
- Washtenaw Community Health Organization (FQHC)
- Wayne State Department of Internal Medicine (Hospital Setting)
- Western Wayne Family Health Center (2 FQHCs)
- Covenant Care (4 FQHCs)
WHO WE’VE SUPPORTED 2012 – PRESENT

$50,000 TO $100,000 ANNUALLY - UP TO 2 YEARS

- Covenant Community Care (4 FQHCs)
- Oakland Integrated Healthcare Network (FQHC)
- Advantage Healthcare (FQHC)
- Detroit Community Health Connection (FQHC)
- Detroit Health Care for the Homeless (FQHC/CMH Partnership)
- Corner Health Center (FQHC)
- Hegira Programs (FQHC)
- William Beaumont Hospital (Hospital Outpatient Clinic)
- Henry Ford Health System (Hospital Inpatient Setting)
- Regents of University of Michigan (School-based Clinics)
OUTCOMES/IMPACT

- Supported implementation of integrated care models in over 20 settings (75% sustained and scaled)
- Large primary care sites serve on average 2,000 patients annually. Approximately 15,000 patients now have access to behavioral health screening, assessment and treatment as part of their routine health care.
- Supported MDHHS pilot pediatric integrated model for children entering the foster care system.
- Partnered with the Pediatric Foundation of Michigan to train primary care doctors and clinical staff at all SE Michigan FQHCs to implement evidence-based standardized behavioral health screening at well-child visits.
Thank you for joining us!

RESILIENT COMMUNITIES. GREAT OPPORTUNITIES FOR ALL.
