# Technical Appendix 

AN EVALUATION OF PRIVATE FOUNDATION MODEL PORTFOLIOS, INVESTMENT RETURNS, \& PAYOUT RATES

## Introduction

, This document includes additional statistics and calculations that were removed from the full report for simplicity and/or brevity. The full report is available online at https://www.michiganfoundations.org/resources/payout-study.
, Tables include additional data for matching tables in the full report.
, We have included a special calculation where the authors examined how calculated returns would change if we excluded foundations with a fiscal year other than the calendar year. The returns did change, but not in a way that caused a material difference in the report findings. Therefore, the full report includes all foundations (regardless of fiscal year).
, All data is drawn from the IRS Form 990 archive maintained on Amazon Web Services and published by the Internal Revenue Service. Researchers at the Johnson Center maintain a weekly archive of this entire data set. All figures were drawn from specific lines of the IRS Form 990-PF documents, as noted below. (The table includes the 2017 line numbers for convenience only, as form line item numbers can vary from year to year.)

| Variable | Formula | 2017 IRS Form 990-PF Field |
| :---: | :---: | :---: |
| Total assets, end of year (EOY) | N/A | Part II line 16c |
| Total assets, beginning of year (BOY) | Prior year's end of year balance | N/A |
| Total investment gain | Total assets EOY - Total assets BOY + total expenses -investment expenses - total revenue + investment revenue | ```Total assets EOY - Total assets BOY + Part I line 26a - Part I line 26b - Part 1 line 12a + Part I line 12b``` |
| Calculated return | Total investment gain / (Total assets BOY + 50\% of contributions) | Total investment gain / (Total assets BOY + 50\% of Part I line 1a) |
| Corpus | Net value of noncharitable assets | Part X line 5 |
| Payout | Adjusted qualifying distributions | Part XII line 6 |

## Analysis: Fiscal Year Ending

, How do the calculated annual investment returns change if we exclude foundations with fiscal years ending on dates other than $12 / 31$ ?

- Investment returns for the model portfolios were calculated on a calendaryear basis.
- If a foundation's fiscal year is not the calendar year, the analysis would be comparing two different periods of time when we look at foundation investment returns versus modeled investment returns.

| Month | Percent of <br> Foundations |
| :---: | :---: |
| January | $0.5 \%$ |
| February | $0.6 \%$ |
| March | $1.4 \%$ |
| April | $1.2 \%$ |
| May | $1.3 \%$ |
| June | $6.1 \%$ |
| July | $1.2 \%$ |
| August | $1.2 \%$ |
| September | $2.9 \%$ |
| October | $1.4 \%$ |
| November | $2.5 \%$ |
| December | $79.7 \%$ |

## Analysis: Fiscal Year Ending

| Year | Number of Foundations | 25th Percentile Return | Median Return | 75 ${ }^{\text {th }}$ Percentile Return |
| :---: | :---: | :---: | :---: | :---: |
| National Detail, All Foundations |  |  |  |  |
| 2014 | 39,094 | -0.8\% | 1.7\% | 5.5\% |
| 2015 | 45,829 | -3.4\% | -0.9\% | 0.5\% |
| 2016 | 50,151 | -2.0\% | 3.3\% | 7.5\% |
| 2017 | 53,703 | -2.0\% | 6.0\% | 12.1\% |
| 2018 | 48,709 | -8.3\% | -4.4\% | -1.7\% |
| National Detail, Fiscal Year Ending December Only |  |  |  |  |
| 2014 | 27,435 | -0.7\% | 2.7\% | 6.1\% |
| 2015 | 33,170 | -3.5\% | -1.3\% | -0.3\% |
| 2016 | 37,347 | -2.0\% | 3.0\% | 6.3\% |
| 2017 | 41,118 | -1.9\% | 8.0\% | 13.1\% |
| 2018 | 42,513 | -8.7\% | -5.4\% | -1.9\% |

## Table 2

## AVERAGE ANNUAL REAL RETURNS FOR MODEL PORTFOLIOS BY STUDY PERIOD

| Average Annual Real Return, Per Study Period | 35\% Fixed Income | 25\% Fixed Income |
| :---: | :---: | :---: |
| Cambridge |  |  |
| 1974-1997 | 6.0\% | N/A |
| 1973-2002 (to capture "dot com" bubble) | 5.2\% | 5.2\% |
| 1973-2010 (to capture early years of The Great Recession) | 4.8\% | 4.9\% |
| 1986-2009 | 6.2\% | 6.4\% |
| 1973-2014 | 5.4\% | 5.6\% |
| PMFA |  |  |
| 1973-2002 (prior model alignment check) | 5.1\% | 5.3\% |
| 1986-2009 (prior model alignment check) | 6.2\% | 6.4\% |
| 2014-2019 (new model including international equities) | 5.6\% | 6.0\% |

## Table 3

REAL ANNUAL RETURNS FOR MODEL PORTFOLIOS, DOMESTIC AND GLOBAL EQUITY, BY YEAR

| Model | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Domestic Equity Only |  |  |  |  |  |
| 35\% fixed <br> income | $10.2 \%$ | $0.4 \%$ | $6.7 \%$ | $12.9 \%$ | $-4.6 \%$ | $21.0 \%$ |
| 25\% fixed <br> income | $10.9 \%$ | $0.5 \%$ | $7.6 \%$ | $14.7 \%$ | $-5.0 \%$ | $23.1 \%$ |

## Table 4

## Notes

## Past performance does not guarantee future results. All investments have risk and the potential for loss as well as gains.

The "Range of Projected Rates of Return" provides an indication of the potential variability of returns throughout the asset allocation spectrum, illustrating the trade off between market risk (volatility) and return. Reviewing these ranges may help measure risk tolerance to withstand losses in a portfolio. All returns assume the portfolio is rebalanced to the stock and/or bond percentages annually.
We show optimized returns calculated by Callan Associates for the next 10-year period. The returns are computed by our optimization software and are based on a diversified portfolio using Callan Associates' capital market projections. Callan's analysts incorporate a variety of current economic data (such as current interest rates, stock price/earnings ratios, and stock price/cash flow ratios, etc.) with historical data to derive expected ranges of returns from diversified portfolios. This allows for the incorporation of more current information in setting expectations.
These modeled performance returns are hypothetical projections and represent the likelihood of possible investment outcomes. They do not reflect actual investment results and are not guarantees of future results. Hypothetical performance has many inherent limitations some of which are described in this disclosure. No representation is made, nor should it be inferred, that any portfolio will or is likely to achieve profits or losses similar to those shown. Returns for investments in the asset allocations shown may not fall within these projected returns. These results are projections of possible outcomes and cannot reflect the impact that material economic and market factors might have on decision making regarding management of the funds. These results assume maintaining positions during periods of severe market decline and do not take into account the ability to sustain losses. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. Returns shown assume the reinvestment of all distributions. These projections were derived from the projection of indexes and do not represent the actual investment recommendations. All investments have risk; inherent in any investment is the potential for loss as well as gain.
The "Range of Real Total Assets" and "Range of Real Spending" charts are based on the market value and/or estimated cash flow assumptions shown. Returns shown for "Range of Real Total Assets" and "Range of Real Spending" charts are hypothetical for illustration purposes only. They are based on the asset allocation mixes shown to illustrate the range of possible outcomes. No expectation should be made or implied that such returns can be achieved.

Data sources for peer group comparisons, returns, and standard statistical data are provided by the sources referenced and are based on data obtained from recognized statistical services or other sources believed to be reliable. However, some or all information has not been verified prior to the analysis, and we do not make any representations as to its accuracy or completeness. Any analysis non-factual in nature constitutes only current opinions, which are subject to change. Benchmarks or indices are included for information purposes only to reflect the current market environment; no index is a directly tradable investment. There may be instances when consultant opinions regarding any fundamental or quantitative analysis may not agree.
Plante Moran Financial Advisors (PMFA) provides this information to convey general information about asset allocation and not for the purpose of providing investment advice. Investment in any of the allocation or strategies mentioned herein may not be appropriate for you. You should consult a representative from PMFA for investment advice regarding your own situation.
